NBR INSULATION

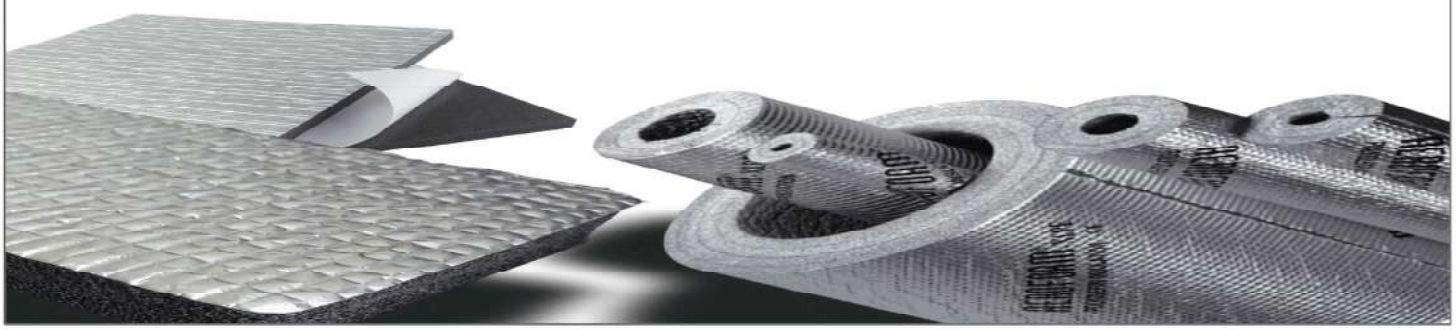

As authorized distributors of AEROFOAM insulation solutions and GoFLEX flexible elastomeric thermal insulation, We strive to offer premium-quality rubber insulation that excel in both thermal and acoustic. Our solutions are composed of closed-cell foam materials with low thermal conductivity, which results in an excellent R-value, making them a perfect fit for applications requiring high energy efficiency. Our product's elasticity and flexibility enable them to endure repeated thermal cycling, thereby providing outstanding durability and longevity. Our solutions are also designed to withstand harsh weather conditions, including ultraviolet (UV) radiation, moisture, and ozone exposure, making them

GoFlex
FLEXIBLE ELASTOMERIC THERMAL INSULATION

We also offer XLPE insulation, which is renowned for its excellent electrical and thermal properties. XLPE is hydronic tubing made of cross-linked polyethylene plastic and has a three-dimensional bond within the plastic. The insulation is a thermoset, zero-halogen insulation that provides flame-retardant properties. As authorized distributors of AEROFOAM insulation solutions, our XLPE insulation products are of the highest quality and

ACOUSTIC SOLUTIONS

It is crucial to prioritize sound isolation and the use of sound-absorbing materials. Some available options include **AeroSound® SLM, AeroSound® SL+, AeroSound® HD, AeroSound® HDM, AeroSound® ALM, and AeroSound® RFM**, which can contribute to a more comfortable acoustic environment.

Calm and Quiet Environment

AeroSound® Duct Liner is an environmentally friendly and hygienic product designed to improve sound absorption and indoor air quality. It offers excellent noise reduction, is safe to handle and install, and resists mold and cleaning chemicals. The product range includes various options such as **LX, LXF, LN, and Elastomeric Sound Absorber (ESA)**.

AeroSound® SF (Silent Floor) underlay is a cross linked closed cell polyolefin foam and ESF is flexible Elastomeric Rubber Foam with medium density underlay for all floating floor applications.

AeroSound offers top-notch rubber gym and sports flooring to enhance your workout. **AeroSound® HIIT** (Rubber Flooring Rolls) is made of high-quality rubber and EPDM rubber sheet color granules, perfect for intense indoor and outdoor activities. Also Aero-Sound® Puzzle (Rubber Interlock Tiles), and AeroSound® Dynamic (SBR Rubber Tiles) are available at your need.
