PRE-INSULATED DUCT

Al Rawabet is delighted to be the distributor of two well-respected and dependable brands in the field of ducting; Alpha PIR and Kingspan PAL

ALPHA-PIR air duct system and Kingspan PAL both high-performance, lightweight pre-insulated Polyisocyanurate solution for air distribution. Fabricated in sections up to 4 meters (13 feet) in length, our duct system offers significant cost and energy savings when compared to traditional metal duct systems. Furthermore, they are fully compatible with standard metal control dampers, fire dampers, access doors, and supporting systems typically used in conventional metal ducts

These polyurethane foam panels comes with 44 ± 2 kg/m3 density, 20 mm thickness, coated on both sides with 80-micron thick aluminum foil.
The aluminum foil is embossed on both sides and coupled with a 2 g/m2 layer of corrosion-resistant polyester paint.
